1/10 SCALE ON ROAD CAR

INSTRUCTION MANUAL

Warming!

This kit is not a toy! Periodic maintenance is required to keep it in top running condition. All the moving hot parts, such as the engine head, exhaust system should not be touched during operation. Precaution is needed to handle the car parts during and after a run. Do not turn off the radio until the car engine is turned off. Safe operation will always ensure a fun time with your car!

FORWORD

Drivers are prompted to read this instruction carefully before assembling. With racer in mind, this car is designed to meet the most critical players in the category. Many details have been attended for the convenience of adjustment and tuning by the track site. Even conservative drivers will find this car to be exactly what they would want from a 1/10 GP On Road Car. With all the attention placed on the car during the designing stage, driver's cautiousness while handling and maintaining of the car is still mandatory to keep it working continually in the best status.

Unless otherwise noted, this kit will come with everything but Motor, Tires, muffler, manifold, fuel, body, Radio, Servos and Receiver Battery. (Detail of additional tools and or items needed for completion is outlined in the following page).

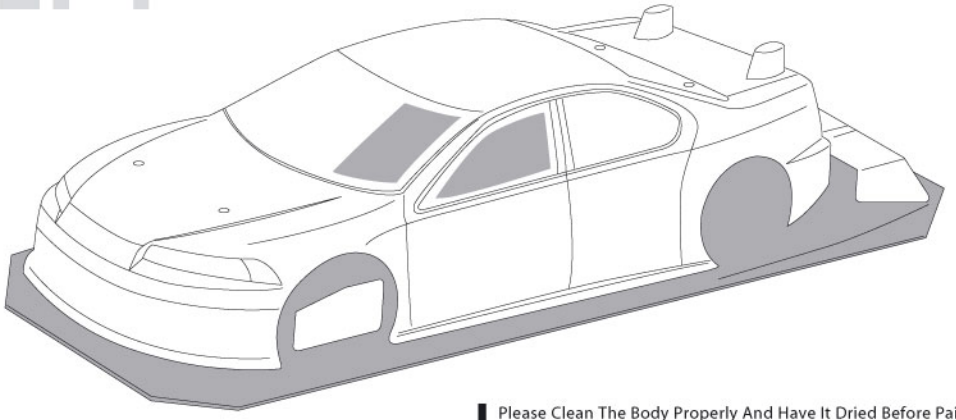
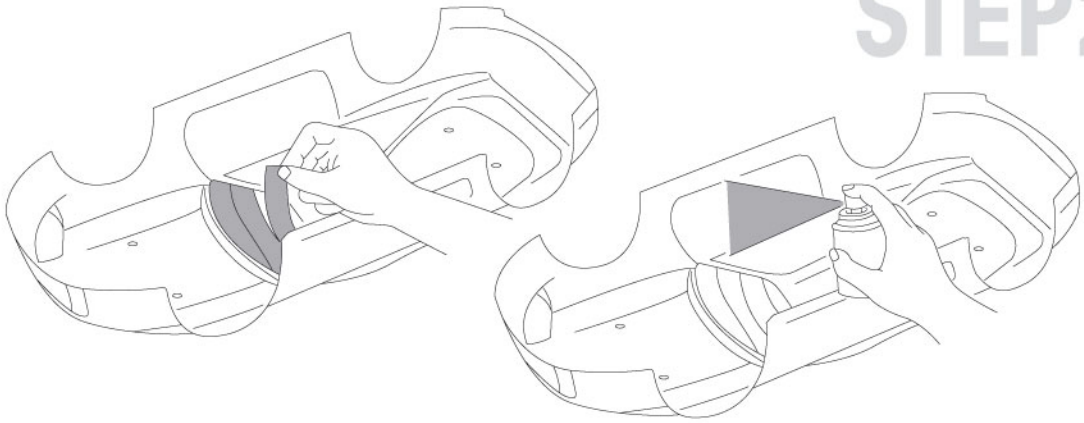
54 《Painting Body》

STEP1



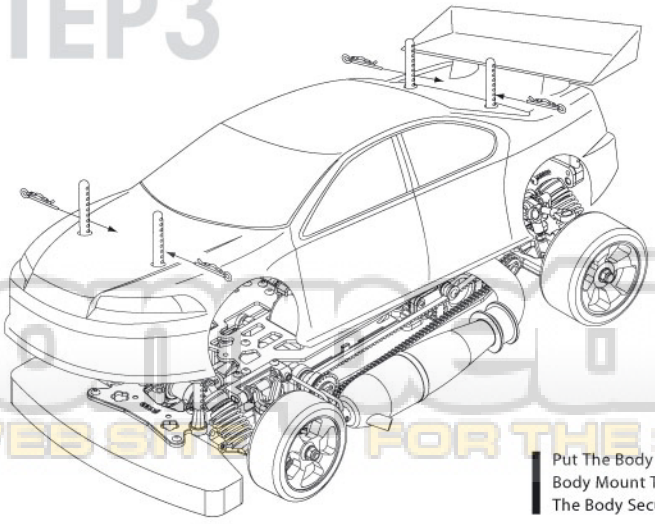
Please Clean The Body Properly And Have It Dried Before Painting. Try To Put The Body On The Car And Cut Holes / Opening Whenever Necessary Before You Proceed To Painting The Body.

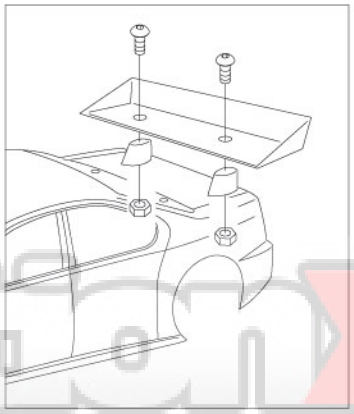
STEP2



Masking The Spot You Do Not Want The Paint On, Then Use Polycarbonate Paint To Paint The Body According To Your Design. Peel Off Masking And Protective Films After The Painting Is Dried.

STEP3





Put The Body On The Car And See If All Positions Fit. Cut Off The Body Mount That Protruded From The Body. Use Body Pin To Clip The Body Securely On The Assembled Car.
