INSTRUCTION MANUAL

1/5th Scale AWD Gasoline Power Off-road Buggy and Monster Truck

A .OFF-ROAD BUGGY

B. MONSTER TRUCK

CompetitionX
A WEB SITE FOR THE SERIOUS RACER

Notes:

- The radio controlled racing models is not toy. It is suited for experienced operators.Read and understand the instructions carefully before operating or assembling your racing model.
- Specifications are subject to change without prior notice, and actual received model may vary from the images and/or descriptions in this manual.

CE ROHS

This manual contains all the basic instructions for assembly, operation, and maintenance.Please read and understand all instructions thoroughly before operating and building your model.

Features:

1.High quality main/diff.gears .
2.Four wheel centre drive system.solid universal joint cups.high performance full ball bearing.
3.Fiberglass brake disc provides quick brake response under high temperature.
4.Wheel rim is assembled and secured by 24 screws enable the tire and wheel rim are not seperated while high speed running.
5. Fold stylish and solid full anodized aluminum 6061chassis.
6. New design solid roll Cage protects the inner instruction perfectly.
7.Perfect design and extra width front/rear suspension arm .
8.Powerful engine system with air filter.full aluminm polished Exhaust pipe.
9.Enhanced suspension arm system,solid front/rear shock tower.
10.High quality unleaded Gasoline+Stroke oil mixture to start your engine.
11.Stylish off road wing .(for Buggy only)

Important Safety Precautions

- Replace the shield body after adjustment and before driving.
- Do not abruptly alter the speed during running.
- Carefully check whether all screws or nuts are loose or not after running.
- Handle the fuel only outdoors!
- Never measure the fuel close to open fire or any source of heat.
- Never run the vehicle without a clean air filter installed.
- Do not run the model lean and do not allow the engine to overheat.
- Use the special fuel for models.
- Store fuel in cool,dry and dark places away from Children's reach!
- Tighten the cap of the fuel bottle when not used.
- Never throw the empty fuel bottle into fire! Otherwise,it may explode.
- Do not put your finger or any object into the rotating or moving parts.
- To avoid the danger of burns, do not touch the engine and muffler immediately after they have stopped running.

Before Starting Your Vehicle

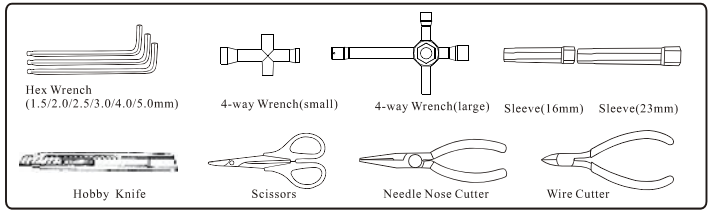
- Verify that all retainers are well fastened (screws, nuts, bolts and clips)
- Verify proper function of steering, drive-line and engine/braking control.

Specifications:(off-road Buggy)

1.Engine:23/28CC PRO
2.Steering Servo:27KG-cm Throttle Servo:9KG-cm
3.Length:720mm
4.Width:490mm
5.Height:285mm
6.Net Weight:12KG. Gross Weight:16.9KG
7.Wheelbase:516mm(F/R)
8.Drive way:upright drive
9.Chassis:4mm thickness. Aluminum6061T6
Ground Clearance:55mm
10.Wheel Diameter/Width:178mm /80mm
Wheel color:black&white;chrome plated
11.Fuel Tank Capacity:700CC
12.Drive System:four wheel suspension drive system
13.Diffirential System:CNC process metal gear
14.Brake Syetem:double brake disc turn round sytem
15.Gear Ratio:7.78:1
16.Receiver battery/charger:1500/2000mAh,Ni-MH battery
17.Body:anti-explode,high resistance
18.Camber Angel:0-8 ℃
19.R/C Control System:FM /AM LCD Transmitter
20.out of Control protection:standard protection equip

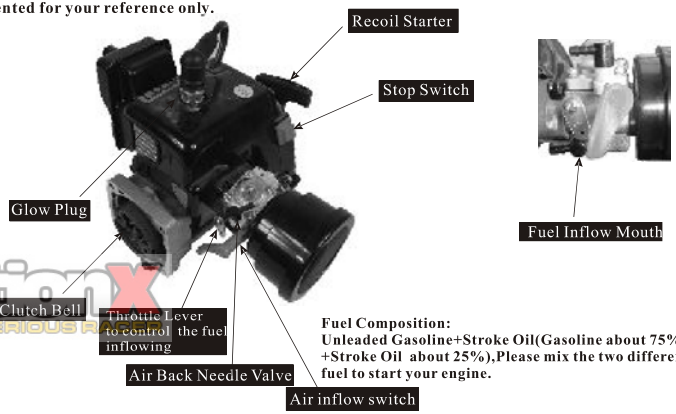
Specifications:(off-road Monster Truck)

1.Engine:23/28CC PRO
2.Steering Servo:27KG-cm Throttle Servo:9KG-cm
3.Length:740mm
4.Width:600mm
5.Height:350mm
6.Net Weight:15KG. Gross Weight:20.5KG
7.Wheelbase:516mm(F/R)
8.Drive way:upright drive
9.Chassis:4mm thickness. Aluminum6061T6
Ground Clearance:72mm
10.Wheel Diameter/Width:212mm/140mm
Wheel rim color:black&white;chrome plated
11.Fuel Tank Capacity:700CC
12.Drive System:four wheel suspension drive system
13.Diffirential System:CNC process metal gear
14.Brake Syetem:double brake disc turn round sytem
15.Gear Ratio:7.78:1
16.Receiver battery/charger:1500/2000mAh,Ni-MH battery
17.Body:anti-explode,high resistance
18.Camber Angel:0-8℃
19.R/C Control System:FM/AM LCD Transmitter
20.out of Control protection:standard protection equip



Engine View

Note:The engine is sticked with warning labels, please pay special attention on it . The image is presented for your reference only.



Fuel Composition:
Unleaded Gasoline+Stroke Oil(Gasoline about 75% +Stroke Oil about 25%),Please mix the two different fuel to start your engine.

Competition X
A WEB SITE FOR THE SERIOUS RACER

Use Transmitter to control your Vehicle...

1/5th scale Gasoline powered RTR model Transmitter has 2 styles, LCD Transmitter(FM)&Multifunctional Transmitter(AM).you can choose it.Below is the LCD Transmitter(FM) function description.

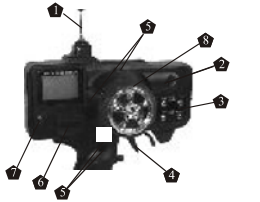
#TR80127
LCD 2-Channel(FM)

#TR80126
Multifunctional
2-Channel(AM)

Battery Precaustions:

1.In order to keep continue better performance under operations, we strongly recommend you to use the 1.5V alkaline batteries instead of the 1.2 V chargeable batteries.eight AA battery should be inserted on the bottom of the transmitter.
2.The batteries may leak in the event that they are installed with wrong polarities.
3.Do not use batteries of different types.
4.Do not leave the batteries if not in use for long periods.

LCD Transmitter(FM)Function Description:

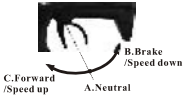


The function switches on the transmitter:

1.Antenna
2.Switch key
3.Four function Key:
Mode Channel
Increase Decrease
4.Throttle Trigger
5.T1/T2/T3/T4:
Shortcut key
6.Power switch on(push up)
Power switch off(push down)
7.Working Indicator
8.Steering Wheel

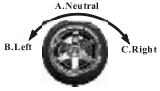
⚠Caution!
Make sure antenna is properly inserted and screwed in the transmitter.Antenna should be fully extended

Throttle Trigger



1.Push the trigger forwards to allow the vehicle to speed down to brake.
2.Pull the trigger backwards to allow the vehicle to go forward and speed up.

Steering Wheel



Turn the steering wheel to the left or right to let the vehicle turn left or right.

Switch on the transmitter,then the receier to start the engine;turn off the receiver then the transmitter to stop running engine.

The 1/5th transmitter has two different setting way.Push up the power button,will enter into common function set.Press the mode fuction key while pushing up the power button, up the power button,will enter into the system function set.

Common Function Setting:

1.The throttle trigger and steering wheel must be in netural position before reading the figure.
2.EPA:
a.EPA-ST : front wheel steering set b.EPA-TH:brake or forwarding operation set.
3.SPD:
a.SPD-TN: steering speed set b.SPD-RN:return to netural position set
4.EXP:(sensibility adjustable range:-100%~+100%;-100% is low-grade,+100% is superior.)
a.EXP-ST:steering sensibility set. b.EXP-FW:forward sensibility set
c.EXP-BK:brake sensibility set.
5.ABS:(anti-slip brake set)
a.ABS-PT:brake return speed set. b.ABS-CY:perform cycle set
c. ABS-DL:extend brake time set d.ABS-MD:off or on set
6.ACC:
a.ACC-FW:add forward speed set b.ACC-BW:add brake speed set
7.BMX: brake function mix set
8.TRM:(idle position adjust)
a.TRM-ST:steering trim set b.TRM-TH:forward trim set
9.D/R
a.D/R steering rate set b. D/R-ST:steering angle set
10.ATL
a.brake intensity set b.ATL-BK:set the brake intensity solely(adjusting brake servo angel)
11.SBT:(two channel idle position set)
a.SBT-ST:steering trim set b.SBT-TH:forward trim set
12.REV:
a.REV-ST:steering reverse set(off/on) b.REV-TH:forward reverse set(off/on)
13.MODE SEL:can save 10 models control data.

System Function Setting:

1.Copy mode control data
2.Mode control data initialization
3.Each mode control data name set.
4.Signal output set(PPM mode only)
5.FNC-SW2:switch key
6.FNC-DT:
a.ST:steering trim adjust b.TH:throttle trim adjust
c.DR:steering control rate DR-ST adjust
d:AT:ATL-BK adjust e.E1:steering EXP-ST adjust f.BK:BMX-RT adjust
7.LED-MD:LED bright adjustment.press the increase or decrease to change light brightness.

2-Channel Radio Transmitting System

Please read the instructions for the radio system carefully before running your car.
The servo is required to be set at Center position before starting assembly. To set the servo at the Idle (Neutral) position switch on the transmitter and receiver. Allow the servo trim arm at Center position, and turn off the transmitter then the receiver.All debug operations are complete, and the servo is in the Middle position that you expect.
